

Prodigy[®] HDLV[®] Manual Gun System

Prodigy[®] HDLV[®] technology precisely dispenses powder coating for superior finish quality, less waste and fast color changes.

The Prodigy HDLV (high-density powder, low-velocity air) manual spray system* is an integrated solution for precision powder coating. The combination of the Prodigy manual powder spray gun and controller and the Prodigy HDLV pump provides for higher transfer efficiency, higher powder output, and ultra-fast color change.

Features of Prodigy HDLV Manual Gun System

- Less air in transport line for lower powder velocity and softer spray
- Softer spray at gun tip for higher first pass transfer efficiency
- Higher first pass transfer efficiency means greater powder savings
- Softer spray with more powder means better coverage in cavities and corners
- Paints faster at high line speeds with higher powder output
- Purgeable design provides ultra-fast color change

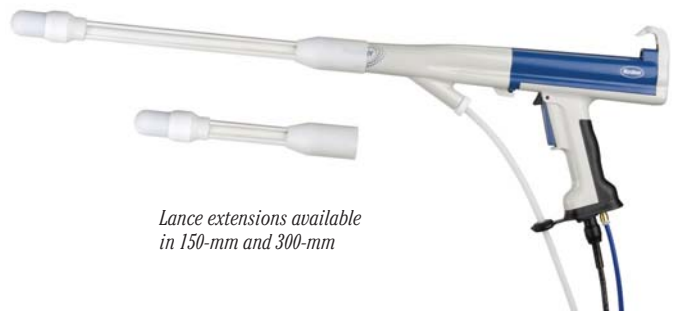

Prodigy Manual Powder Spray Gun and Controller

- Auxiliary high-low flow adjustment trigger
- Innovative HDLV conical and flat-spray nozzle technology
- 10 user-configurable presets
- 150-mm and 300-mm lance extensions available

Prodigy HDLV Pump

- Purgeable in both directions – suction and delivery
- See-through design for quick, easy diagnostics
- No moving parts or seals to service or replace

Lance extensions available in 150-mm and 300-mm
